

Mobile Access Codes vs. One-Day Codes

Mobile Access Codes:

- Provided only to SentiLock users;
- Issued only through the SentiSmart app;
- Should never be given out or used by anyone other than the SentiLock user;
- Use of the mobile access code by anyone other than the SentiLock user eliminates the ability to track access as the history report will show the SentiLock user's name only;
- When used by anyone other than the SentiLock user, security of the SentiLock system and your client's property is compromised.

One-Day Codes:

- Provided to non-SentiLock users or service providers such as home inspectors, painters, etc;.
- Issued through the SentiLock website or SentiSmart app;
- Can be given out because the name of the person who is given the code is required in SentiLock which provides the ability to track access to the property;
- When used properly, One-Day Codes uphold the security of the SentiLock system and your client's property;
- Detailed records on access to the seller's property are available when the One-Day Codes are issued properly.
